

MEMBERSHIP DOCUMENT

EUROPEAN FEDERATION REGENERATIVE MEDICINE

Our aims are to achieve:

- a joint representation of all stakeholders in the field, including science, technology, industry, therapeutic fields, patients and the public at large within Europe.
- A joint representative board will be formed by the partnering societies, infrastructures and networks.
- an united European voice for the field.
- that partner societies, networks and infrastructures will be able to interact freely on an equal standing basis with the other partners.

The federation shall not be a new society but rather a joint representation of complementary organizational entities with a focus on Europe linked by our common interest in Regenerative Medicine. The federal board will be formed by the figureheads or representatives of the stake holding European societies, networks and infrastructures. In a democratic process an executive board will be chosen by the representatives.

Membership of the respective institution does not carry any legal or financial obligation but is a sole expression of interest to be a rightful member of the European Federation Regenerative Medicine. Withdrawal of membership is possible at any time by notification to the joint board of the European Federation Regenerative Medicine.

I agree to join the European Federation Regenerative Medicine as a representative of the following Society, network or institution, which will become thus a Founding Member.
